

Attention All Members of Local 83 – ESSO Refinery Shut Down

We have been speaking with Aluma Systems and they are planning for a shut down in May 2010. In order to be allowed on site, any members dispatched **must have their safety courses up to date** or they will be sent home when they go in for orientation.

If you need any courses please call Ron MacDonald at (902) 454-5100 ext 26 or the Nova Scotia Construction Safety Association at (902) 468-6696.

We do not want any member to miss out on this opportunity for work so it is very important that you make sure your courses are up to date.
